Subject: MICROSOFT SETTLEMENT

I support the Microsoft Settlement that has been reached with 9 states. Bill Gates and Microsoft should not continue to be punished. America has always been about innovation, creativity and competition. It is part of our culture and drives everything we do. It is time to move forward and renew the pace of technological innovation that is driving our economy and enhancing our nation's productivity. Technology and productivity enhancements are America's only sustainable competitive advantage in a global economy, and it is wrong to threaten that for the sake of a few envious Microsoft competitors.

Regards,
Clark Handy
